

## *The Legend Lives Again...*

### **OUR NEW 815 SE REPLICA INSPIRED BY THE 1937 CORD**

The original has become legend . . . we have made that legend live again. Created in 1935 by America's premier designer, Gordon Buehrig, the original Cord was a harbinger of design. As recreated by us, it offers perfection in every detail. This is the most authentic replica ever created . . . produced in the exact scale as the original car . . . faithful to the original design in every respect. Front wheel drive . . . hidden headlights . . . airplane styled instrument panel . . . fingertip shift control . . . all the design elements that have made the original cars such desirable collectors items have been flawlessly incorporated in our new replica. That and more. Modern V-8 engine . . . automatic transmission . . . power steering and brakes. The convenience of air conditioning and a fine stereo radio . . . power windows and seat

. . . power operated hidden headlights. Unique features offered by no other American maker . . . a power operated hood and trunk as well as an electronically controlled and electrically powered shift selector. Crafted by hand at the rate of only two a month, these cars require over 2000 man hours for their production. Hundreds of hours, and nearly 5 gallons of paint are necessary to achieve our mirror-like exterior finish. Each of the imported Connelly hides used in our interior is hand selected by our master trimmer. Nothing but the very finest components are used. Then, after more than 1000 separate inspections, each car is given a 200 mile road test . . . our way of making sure your new 815 SE Cord Replica is everything it was meant to be. For your continuing assurance, each car is covered by a 12 month/12,000 mile warranty. Your test drive is invited. Brochure available upon request.
